SUMMARY

Full-Stack Web Developer with 5 years of experience across **international** companies and clients with proven ability to lead teams and ship impactful products, building scalable solutions using Node.js, React, and AWS. Delivered high-performance systems serving **over 410,000 users**, driving measurable gains in speed, engagement, and scalability. Excellent at leveraging AI tools to boost development speed.

EDUCATION & CERTIFICATES

Ecole Polytechnique Sousse (<i>Software engineering major</i>)	<i>Tunisia</i>
AWS Solutions Architect Associate	<i>10/ 2025</i>
IELTS (C1)	<i>05/2025</i>
Test Evaluation Francais (C1)	<i>10/2024</i>

WORK EXPERIENCE

Full Stack Web Developer (Backend Focused), TakiAcademy, Tunisia *06/2021 – Current*

- Led 3 members cross-functional team (backend, mobile, QA test) using Agile/Scrum directing the backend development, conception, and cloud architecture for a LinkedIn-style platform for European footballers delivering 95% of milestones on time across all projects.
- Architected an AI-based recommendation systems into client applications using OpenAI API, increasing user engagement by 20% through personalized content & product suggestions.
- Engineered a real-time messaging and notification feature using Socket.io, Firebase for push notifications, and integrated Stripe API for payments, serving 5,000+ monthly users.
- Automated CI/CD pipelines using Jenkins and GitHub Actions for building and deployment processes, improving deployment speed by 30% and reducing server latency by 15%.
- Migrated from a single-tenant to a multi-tenant MongoDB architecture, engineered a SaaS infrastructure supporting multiple organizations under a single codebase, and reduced deployment overhead by 40%.
- Optimized queries and utilizing Redis for caching and session management boosting performance by 20% for Tunisia's largest learning platform serving +410k users.
- Built scalable cloud solutions using IAM roles, S3 for storage, CloudFront for caching, DynamoDB for database management, improving secure data access by 50%.
- Developed a React-based frontend with Redux state management, optimizing data retrieval speeds by 50% through lazy loading and TanStack.
- Directed backend conception of models and cloud, architecture with Typescript, AWS and REST API for a multi-national startup in Tunisia & Qatar, reducing time-to-market by 60%.

Full Stack Developer, Freelance, Montreal Canada *01/2025 to 09/2025*

- Developed full-stack CRM solution (React, Next, Tailwind, Node.js, MongoDB) for a Quebec based recycling business, enhancing operational efficiency.
- Selected and spearheaded the implementation of the tech stack, prioritizing production stability and increasing project efficiency by 50% while minimizing future technical debt.
- Overhauled database indexing and queries using MongoDB and Redis, accelerating platform performance by 30% and integrated SupaBase for storage and global CDN
